ABOUT ME

HARDWARE & SOFTWARE ENGINEER

I lead automation and control solutions for the Internet of Things and Industry 4.0. I am very passionate about hardware and software development, so I have focused my academic training on three areas of engineering: Electronics, IT Systems and Telecommunications, so I can have a wider vision of the technologies I develop. About software, I am Sr Developer on Microcontroller Embedded System with C/C++; and also, Full-Stack Sr. with Angular/React on Frontend and NodeJS on Backend; Integrating Cloud Services with Google and AWS.

WORK EXPERIENCE

2021 - …	Automation Leader Engineer at Telemetrik	COLOMBIA
